FEATURE

VALUE

1. 32-Degree Windshield	Panoramic visibility and aerodynamic characteristics
2. PACCAR MX-13 Engine	Maximum performance, superior fuel efficiency and lower operating costs
3. Aero-Enhanced Hood with 90-Degree Tilt	Improved airflow, visibility and outstanding under-hood access
4. Stainless Steel Grille with Chromed Surround	Peterbilt signature styling with excellent durability and protection
5. Hood Tilt Assist with Anti-Blow-Down	Improved serviceability and safety
6. Projector & HID Headlamp Options	Standard halogen projector and optional high-intensity discharge headlamp provide excellent visibility
7. Integrated Driving Lamps	Significant increase in overall visibility
8. Standard Front Air Disc Brakes & Electronic Stability Control	Reduces stopping distances, improves driveability and enhances on-road stability
9. Battery & Tool Box with Lift Assist Struts	Easy and secure access to tools and batteries
10. Metton® Chassis Fairings	Excellent airflow management and outstanding durability
11. High-Visibility Mirrors	Aerodynamic and stable mirror design for excellent visibility
12. Ergonomic Dash Layout	Optimized for driver efficiency and vehicle operation
13. Aerodynamic Sunvisor & Contoured Roof	Airflow management to reduce aerodynamic drag
14. Spacious Integrated Sleeper	75", Roomy, comfortable sleeper with large bunk and ample storage

OPERATOR COMFORT

Spacious integrated sleeper delivers classic Peterbilt amenities in an efficient layout designed with the driver in mind.

EXCEPTIONAL VISIBILITY

The Model 587 headlamps significantly improve visibility, providing better overall road coverage and down-road visibility.

CONVENIENT ACCESS

The battery and tool box feature a lift assist design for durability and overall ease of use. A gas strut ensures items are stored securely.

STANDARD FRONT AIR DISC BRAKES

Air disc brakes offer reduced stopping distance when compared to drum brakes and enhanced driveability during braking.
